

## Abstract

The present invention relates a yellow dye composition, liquid dye composition, and ink composition which each contains compounds represented by the formulae

(1)

(1) and (2):

Wherein, M and L each represents hydrogen, an alkali metal, alkaline earth metal, cation of an organic amine, or ammonium ion. They have satisfactory long-term storage stability in an aqueous solution having a dyestuff concentration as high as 6 to 10%. They have a hue and vividness which are suitable

(2)

for ink-jet recording, and are characterized by giving prints high in fastness regarding light fastness, etc.
